Lakewood, Colorado 80228

Dear Mr. Herst:

I have reviewed the changes made to the "Physical Characterization Technical Memorandum" and find the document to be fully acceptable. I have no further comments concerning this portion of the West Lake Landfill Operable Unit 2 activities. The monitoring network is satisfactory, and the next phase of the work should commence as soon as possible. Please provide a revised detailed schedule of future activities for this site. I would expect to see the revised schedule prior to the middle of December. If you have any questions, please do not hesitate to contact me.

Sincerely,

Steven E. Kinser R.G.
